EDUCATION

Bachelor of Technology — Computer Science and Engineering

Jul 2023 – Aug 2027 (Expected)

Gauhati University, Guwahati, India

- Relevant Coursework:** Data Structures & Algorithms, Design & Analysis of Algorithms, Computer Organization & Architecture, DBMS, Operating Systems, Computer Networks, OOP, AI/ML, NLP, Theory of Computation, Nature-Inspired Computing, Brain-Computer Interface, Web Technologies.
- Honors:** Merit-Based Scholarship awarded at admission for academic excellence.

SKILLS

Languages & Frameworks: Python, JavaScript (ES6+), C++, React.js, Node.js, Express.js, FastAPI

Databases & Web: MongoDB, MySQL, HTML5, CSS3, REST APIs

Real-Time & AI: WebRTC, Socket.io, Local LLMs (Ollama / Qwen 2.5), Faster-Whisper

Other: Cybersecurity Fundamentals, Git/GitHub

FEATURED PROJECTS

AI Meeting Summarizer & Action Item Extractor

Python · FastAPI · Faster-Whisper · Ollama · React

- Architected a privacy-focused, fully local meeting assistant that transcribes multi-speaker audio recordings and extracts structured minutes and action items with zero cloud API costs.
- Integrated Faster-Whisper for accelerated speech-to-text and Qwen 2.5 via Ollama with a streaming FastAPI backend and a responsive React dashboard.

ShopNext — Full-Stack MERN E-Commerce Platform

React · Node.js · Express · MongoDB · Redux Toolkit

- Engineered a full-stack e-commerce platform featuring secure JWT authentication, role-based access control, dynamic product/catalog filtering, and order management.
- Implemented global state management with Redux Toolkit for real-time, persistent cart synchronization and a seamless checkout workflow.
- Developed a low-latency, real-time video conferencing application enabling direct peer-to-peer audio/video streaming and live chat via a Socket.io signaling architecture.

RELEVANT EXPERIENCE

Software Engineering Intern — Assam Power Distribution Company Limited (APDCL)

Jul 2026 – Jul 2026

Developed an AI-Powered Multilingual Meeting Transcription & Summarization Platform using FastAPI, React 19, SQLite, and NLP. Engineered a robust backend REST API and responsive interface to automate the documentation of enterprise technical meetings.

Information Technology Intern — Airports Authority of India (AAI)

Jul 2026 – Jul 2026

Completed an intensive internship under the IT Department at the Regional Headquarters, focusing on IT infrastructure operations. Gained hands-on expertise in enterprise networking protocols, system administration, and airport technology systems.

Full-Stack Developer Intern — The Entrepreneurship Network (TEN)

Apr 2026 – Jul 2026

- Developed responsive user interfaces with React.js and integrated secure RESTful endpoints with Node.js/Express for asynchronous data handling.
- Collaborated within an agile team workflow using Git; awarded a **Letter of Completion (LOC)** and a **Letter of Recommendation (LOR)**.

Summer Intern — Directorate of Forensic Science, Assam (Cyber Division)

Jun 2025 – Jul 2025

- Conducted practical evidence acquisition and data recovery utilizing industry-standard cyber forensics toolsets in a government lab.
- Executed deep-level disk and mobile device analysis to extract, preserve, and document critical digital evidence.

CERTIFICATIONS & TRAINING

- Artificial Intelligence Specialization** (270 Hours) — Reliance Foundation Skilling Academy & NSDC (Nov 2025)
- Cyber Forensics Internship Certificate** — Directorate of Forensic Science, Assam (Jul 2025)
